## **MINIMUM STANDARD HEALTH PROTOCOLS**

### **☑** CHECKLIST FOR WATERPARK OPERATORS

Page 1 of 3

Effective May 29, 2020, indoor waterparks may operate up to 25% of the total listed occupancy of the indoor waterpark facility and outdoor waterparks may operate up to 25% of the normal operating limits as determined by the waterpark operator. Waterpark operators must close any components of the waterpark that have interactive functions or exhibits, including child play areas, amusement, and video game areas.

The following are the minimum recommended health protocols for all waterparks choosing to operate in Texas. Waterparks may adopt additional protocols consistent with their specific needs and circumstances to help protect the health and safety of all employees, contractors, and customers.

The virus that causes COVID-19 can be spread to others by infected persons who have few or no symptoms. Even if an infected person is only mildly ill, the people they spread it to may become seriously ill or even die, especially if that person is 65 or older with pre-existing health conditions that place them at higher risk. Because of the hidden nature of this threat, everyone should rigorously follow the practices specified in these protocols, all of which facilitate a safe and measured reopening of Texas. The virus that causes COVID-19 is still circulating in our communities. We should continue to observe practices that protect everyone, including those who are most vulnerable.

Please note, public health guidance cannot anticipate every unique situation. Operators of waterparks should stay informed and take actions based on common sense and wise judgment that will protect health and support economic revitalization. Operators of waterparks should also be mindful of federal and state employment and disability laws, workplace safety standards, and accessibility standards to address the needs of both workers and customers.

#### Health protocols for your employees and contractors: Train all employees on appropriate cleaning and disinfection, hand hygiene, and respiratory etiquette. Screen employees and contractors before coming into the waterpark: Send home any employee or contractor who has any of the following new or worsening signs or symptoms of possible COVID-19: Sore throat Cough Shortness of breath or difficulty Loss of taste or smell breathing Diarrhea Chills Feeling feverish or a measured temperature Repeated shaking with chills greater than or equal to 100.0 degrees Fahrenheit Muscle pain Known close contact with a person who is lab confirmed to have COVID-19 Headache Do not allow employees or contractors with new or worsening signs or symptoms listed above to return to work until: In the case of an employee or contractor who was diagnosed with COVID-19, the individual may return to work when all three of the following criteria are met: at least 3 days (72

hours) have passed *since recovery* (resolution of fever without the use of fever-reducing medications); and the individual has *improvement* in symptoms (e.g., cough, shortness of

breath); and at least 10 days have passed since symptoms first appeared; or

## MINIMUM STANDARD HEALTH PROTOCOLS

## WATERPARKS: Page 2 of 3

- In the case of an employee or contractor who has symptoms that could be COVID-19 and does not get evaluated by a medical professional or tested for COVID-19, the individual is assumed to have COVID-19, and the individual may not return to work until the individual has completed the same three-step criteria listed above; or
- If the employee or contractor has symptoms that could be COVID-19 and wants to return to

		work before completing the above self-isolation period, the individual must obtain a medical professional's note clearing the individual for return based on an alternative diagnosis.	
		Do not allow an employee or contractor with known close contact to a person who is lab-confirmed to have COVID-19 to return to work until the end of the 14-day self-quarantine period from the last date of exposure (with an exception granted for healthcare workers and critical infrastructure workers).	
	Have employees and contractors wash or sanitize their hands upon entering the premises and interactions with visitors.		
	Have employees and contractors maintain at least 6 feet of separation from other individuals. If such distancing is not feasible, other measures such as face covering, hand hygiene, cough etiquette, cleanliness, and sanitation should be rigorously practiced.		
	If the waterpark provides a meal for employees and/or contractors, the waterpark is recommended to have the meal individually packed for each individual.		
	conti	istent with the actions taken by many employers across the state, consider having all employees and ractors wear cloth face coverings (over the nose and mouth). If available, employees and contractors ld consider wearing non-medical grade face masks.	
Hea	lth p	rotocols for your facilities:	
	facili	eet of separation is not available between employees, contractors, and/or customers inside the ty, consider the use of engineering controls, such as dividers between individuals, to minimize the ces of transmission of COVID-19.

## WATERPARKS: Page 3 of 3

Ш	No tables of more than 6 people.		
	Contactless payment is encouraged. Where not available, contact should be minimized. Both parties should wash or sanitize hands after the payment process.		
	For waiter-provided food service:		
		Do not leave condiments, silverware, flatware, glassware, or other traditional table top items on an unoccupied table.	
		Provide condiments only upon request, and in single use (non-reusable) portions.	
		Clean and disinfect the area used for dining (table, etc.) after each group of customers depart the theater.	
		Use disposable menus (new for each patron).	
		If you allow customers to write down their food orders, provide take-home pencils and notepads that cannot be used by other customers.	
		Have wait staff sanitize or wash hands between interactions with customers.	
	For counter food service:		
		Provide condiments or flatware only in single use, individually-wrapped items, and provide condiments only upon request.	
		Have employees and contractors follow proper food-handling protocols.	
		Disinfect any items that come into contact with customers.	
		in and disinfect the area used for dining (table, etc.) after each group of customers depart,
