

Alley Rehabilitation Section B

Update: 8/11/2026

Construction update

The City of McAllen is beginning an **Alley Rehabilitation Project** in your neighborhood to improve the condition, safety, and long-term usability of the alley serving your property. Work is anticipated to begin **July 8, 2026** and is expected to continue through **March 23, 2027**, weather and construction conditions permitting.

What to Expect

During construction, residents should expect:

- **Temporary access restrictions:** Alley access may be limited or unavailable at certain times while crews are working. Please follow posted signs and instructions from construction personnel.
- **Construction activity:** You may see construction crews, equipment, materials, and increased noise in the area during working hours.
- **Temporary parking changes:** Please avoid parking or storing vehicles, trailers, or other items within the alley or designated work areas.
- **Dust and debris:** Some dust, dirt, and construction debris may occur during the project. Crews will take reasonable measures to minimize these impacts.
- **Changes to driveways or access points:** Temporary disruptions may occur as work progresses. Residents will be notified when access to individual properties is expected to be affected.
- **Restoration:** Once rehabilitation work is complete, disturbed areas will be restored as appropriate.

We appreciate your patience and cooperation while this important improvement is completed. Every effort will be made to minimize impacts to residents and maintain access whenever it is safe and practical to do so.

Project Contact

For questions or concerns about the project, please contact:

City of McAllen Engineering Department

Phone: (956)681-1151

Luis Hernandez
